INTRODUCTION FROM OUR CEO SIMONE SQUERI

I am proud to lead a Company shaped by decades of innovation and technology, alongside a passionate team, truly committed to LISTENING - listening to understand your goals, tackle your challenges and deliver tailored solutions.

Excited to work together and hoping to meet you soon!

WHAT WE DO

Since 1967, ADUE has been supplying leading bottling companies worldwide with CUSTOMIZED beverage preparation and water treatment solutions.

CHOSEN BY BEVERAGE LEADERS

Used by major players in the beverage industry, ADUE systems help TOP BOTTLERS worldwide optimize production and boost performance.

100+

PROJECTS run
every year

1,000+

compared to 2024

SOLUTIONS AND SYSTEMS

WATER TREATMENT

Starting from the initial water analysis and characteristics, we combine treatments and technologies to reach the desired quality of treated water.

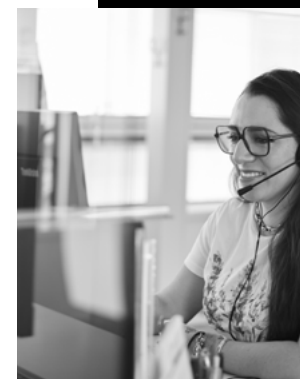

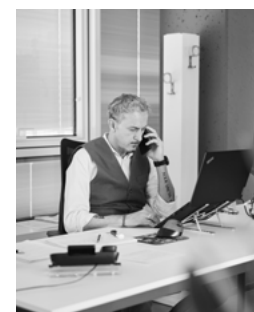

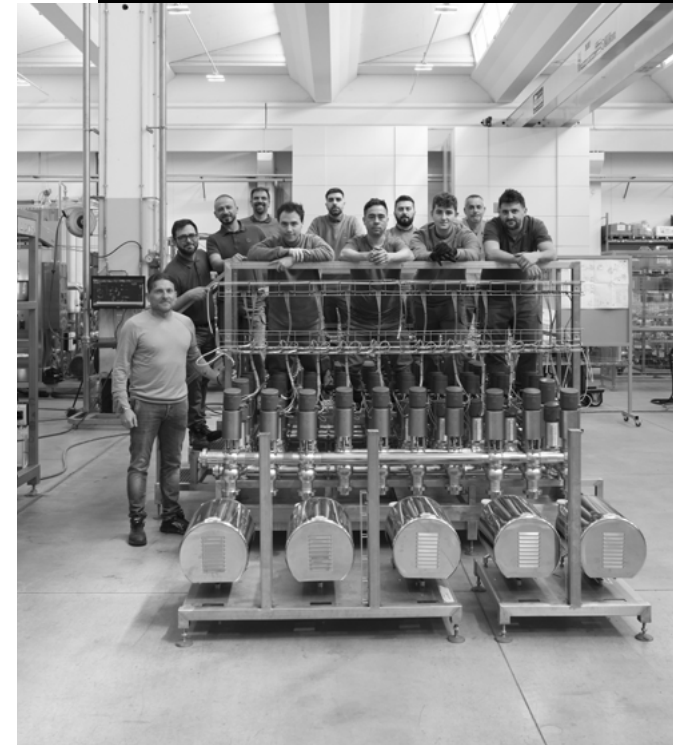

BEVERAGE PREPARATION

We design and manufacture automated beverage preparation systems, providing tailored solutions from raw material handling to finished product delivery.

WASTE WATER TREATMENT

We develop advanced systems for water recovery & treatment, offering efficient and sustainable solutions to optimize resources.

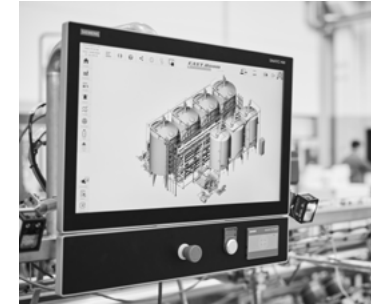

ALWAYS BY YOUR SIDE

ADUE offers tailored solutions and comprehensive SUPPORT for every step of the beverage production process.

GLOBAL PRESENCE

A solid international network of representatives and certified service partners ensures reliable support, wherever you are.

Strategic coverage in key regions: Europe, North Africa, Latin America, and the Middle East.

Innovative Engineering

Custom project development and system upgrades to ensure top-level performance.

30+ experienced engineers providing multilingual support (English, French, Spanish).

Field and After-Sales Services

Multilingual phone assistance in five languages, including remote troubleshooting.

20+ skilled technicians across strategic locations for on-site support.

Project Management Skills

The maximum value per ADUE project keeps growing.

This is proof of our ability to manage even the most complex challenges with precision and reliability.
