

CORPORATE ENVIRONMENTAL POLICY FOR THE TRIENNIUM 2025-2027

A DUE SPA, to reduce the environmental impact of its activities, will:

- Act responsibly, respecting the environmental legislation in all the Countries where the company operates, seeking to meet the legislative targets or even better targets.
- Be committed to protecting the environment, ecosystems and biodiversity.
- Promote environmental awareness and responsibility amongst employee and stakeholders and their proactive role for the development of a culture oriented to quality and environmental protection.
- Integrate the environmental issues into all aspects of the decision-making processes.
- Reduce the environmental impacts of the company activities, with particular attention to promotion of energy saving of natural resources: paper, water, electricity, fuel.
- Reduce the CO₂ emissions generated by its business.
- Minimize waste, promote recycling, and the use of recycled products to help reduce the amount of waste sent to landfill.
- Adopt a sustainable sourcing Purchasing Policy.
- Preferably choose technologies, for the implementation of the company product range, which can eliminate or reduce the use of hazardous substances to humans or the environment.
- Promote and design carbon reducing equipment: transportable machines and systems, with the smallest dimensions and less packaging possible, equipment operating with low consumption of water and energy and able to minimize wastage of product / process.
- Reduce the paper printing, replacing printed documents with paperless documents to be shared on-line on the platform chosen for the data management, and making them accessible also through mobile devices.
